Languages

- Slovenian (Native)
- English (Fluent)
- Croatian (Working knowledge)
- German / Italian / French (Basic)

Interests

- MotoGymkhana
- Volunteer Firefighting
- Volunteer First-Aid Medic

Profile

I’ve spent 20 years in software, building PHP and Node backends, JavaScript frontends, and data pipelines that cannot break.

Today I multiply that experience with a modern and evolving AI-native workflow that turns that depth into more of what I can ship.

My background before software was 7 years driving heavy trucks internationally: it taught me reliability, self-reliance, and how to solve problems alone at 3am with no backup.

Outside of work: volunteer firefighter and first-aid medic.

Core values: Truth · Loyalty · Mastery.

Professional Experience

Senior Full-Stack Engineer

Dec 2024 – Feb 2026
Freelance, Slovenia

Booking system for instructor-led classes, built for a private investor.

- Sole developer of the complete backend (OctoberCMS plugin), admin panel, and Vue/Nuxt frontend app
- The system handles instructor scheduling and pricing, student booking, payments, and administration.
- Collaborated with a designer/PM who handled UI/UX

Senior Software Developer

Nov 2023 – Mar 2025
LELOSI, Slovenia

LELOSI is a clothing manufacturer and an e-commerce company.

- Expanded the internal operations platform used across fulfillment, customer support and finance
- Built shipping integrations for 6 international couriers including label generation, parcel tracking and automatic error recovery
- Designed and implemented postcode validation and error correction across 18 European countries
- Optimised system performance and extended API integrations with adjacent systems

Senior Full-Stack Developer

Apr 2023 – Sep 2023
VAVEN, Slovenia

VAVEN is a marketing platform connecting advertisers with web publishers. Joined to prepare the product for VC funding phase.

- Integrated a payment processor end-to-end
- Implemented a full design overhaul
- Resolved a backlog of polish and stability issues across the platform

Senior Backend Developer

Sep 2022 – Dec 2022
Carbon6, USA (remote)

Carbon6 acquired SellerTools (see below). Continued backend development on the same platform under new ownership.

Senior Backend Engineer

Apr 2022 – Aug 2022
Grashka, Slovenia

Grashka is a plant-based food brand and e-commerce platform (grashka.co).

- Built the backend in PHP and set up the Docker development environment
- Mentored a junior frontend developer and improved frontend code in React
- Managed code integration and deployments to staging and production

PHP Backend Developer

Jul 2020 – Sep 2021
SellerTools, Novo Mesto, Slovenia

SellerTools provides product ranking and optimisation services for Amazon sellers. Later acquired by Carbon6.

- Developed and continuously optimised core platform services
- Provided technical customer support

PHP Backend Developer

Jul 2018 – Apr 2020
D·Labs, Ljubljana, Slovenia

Rejoined D·Labs (now ~100 people) as part of an international team.

- Developed and maintained a complex multi-feature hub for the global fashion industry
- Built a distribution and sales platform for legal cannabis products for a New York startup

Business Application Developer

Mar 2013 – Sep 2017
Freelance, Novo Mesto, Slovenia

Long-term remote projects for foreign clients. Sole developer on two major engagements.

- Asset Management / Workflow application for an Australian sound studio, integrated with a proprietary CRM system
- Systems monitoring application for a German IT services provider operating on river cruise ships

Web Developer

Jul 2011 – Dec 2012
D·Labs, Ljubljana, Slovenia

D·Labs specialised in full-stack startup development.

- Luxury property rental website for a New York startup (co-located with client)
- Subscription plan comparison platform for Slovenia's national telecom regulator
- Global hub overhaul for wine producers and distributors (French client)

Software Developer

Sep 2010 – Apr 2011
3Hops, Novo Mesto, Slovenia

A micro-startup with unusually complex engineering projects.

- SCADA system for a 6MW industrial water boiler/steamer: touch-optimised desktop app in C#.NET
- Home Automation System built from scratch including hardware components
- Remote-controlled street lighting control software for an Italian research company

Junior Software Developer

2001, 2003 – 2004
ICE Information Solutions, Ljubljana, Slovenia

Small company developing call centre solutions and tailor-made CRM systems. Joined part-time while at university; pace of learning led me to leave academia and go full-time.

- Developed modules for CRM systems (clients included Moscow Telecom)

Other Experience

Camera Operator - RTV Slovenija · 2022. Sporting events coverage for national television.
Long-Haul Truck Driver - Intereuropa Koper & others · 2002, 2005–2010. Nearly a million kilometres across Western Europe.
Technical Director / Camera / Editor - Local TV, Novo Mesto · 1996–1998. Field and studio camera, linear video editing, technical director of a weekly live talk show.
